

betterbrass ONE.5

The revolution for plain brass wires - soft version for taper cutting

bedra combines a better continuous casting process with better heat treatment methodologies to create an unparalleled EDM wire: **betterbrass ONE.5**. Our engineers created a brass wire electrode comprised of a completely new alloy that delivers up to 10% faster cutting speed, plug-and-play on all machine types and many more. **This EDM wire utilizes innovative and efficient production processes to deliver performance never before seen in a traditional brass wire.**

- **Soft version for taper cutting**
- Extremely reliable performance
- Plug-and-Play on all machine types
- Cuts up to 10% faster than traditional brass wire
- Innovative alloy and casting technology delivers high process performance and reliability
- Specially developed heat treatment process enhances cutting performance
- Better performance at a better price

Faster eroding. Less wire consumption. Lower wire costs.

Further information can be found in the **betterbrass ONE** flyer.

Technical data

Core	CuZn40 - special alloy
Surface	Paraffin-free
Tensile strength	500 MPa / 72,500 PSI
Elongation	>10 %
Color	Pyrit-Gold
Diameter	0.20 / 0.25 / 0.30 mm
Spool types	K160, K200, P5, P10

Delivery program

Diameter [mm]	0.20	0.25	0.30
K160-Spool: 8 kg	●	●	●
K200-Spool: 16 kg		●	●
P5-Spool: 5 kg	●	●	
P10-Spool: 10 kg		●	●
