

megacut[®] pro TWO

The second generation brass wire for Japanese EDM machines

megacut[®] pro TWO EDM wire is now the result of a careful adaptation of the wire properties to the conditions of the most modern machine series of Japanese OEMs.

Adaptions:

- Significant increase in surface cleanliness
- Increase of tensile strength from 900 MPa to 1,000 MPa
- Adjustment of diameter tolerance

Results:

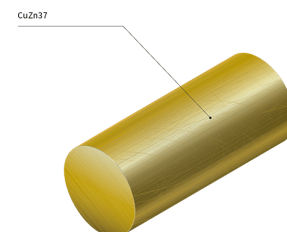

- Longer maintenance-free machining cycles
- Guaranteed maximum threading safety even under difficult conditions, typical for serial production
- Tight tolerances for modern closed wire guides

Further information can be found in the **megacut[®] pro TWO** brochure.

Technical data

Core	CuZn37
Coating	Paraffin-free
Tensile strength	1,000 MPa / 145,000 PSI
Elongation	>1%
Color	Gold

Delivery program

Diameter [mm]	0.20	0.25	0.30
K160-Spool: 8 kg	●	●	●
